## Career Summary

Computer Science Engineering graduate with a genuine interest in software development and a strong willingness to learn and grow. Enjoys solving problems, exploring new ideas, and applying technical knowledge to build practical solutions. Adaptable, self-motivated, and eager to start a career in software development.

## Technical Skills

|              |                                                                          |
|--------------|--------------------------------------------------------------------------|
| Languages    | Java, Python, JavaScript, TypeScript, SQL                                |
| Frontend     | HTML, CSS, React.js, Tailwind CSS                                        |
| Backend      | Spring Boot, RESTful Web Services                                        |
| Databases    | MySQL, MongoDB, PostgreSQL                                               |
| Core CS      | OOP, Data Structures & Algorithms, DBMS, System Design, Low Level Design |
| Cloud/DevOps | AWS, Docker, Docker Compose                                              |
| Tools        | Git, GitHub, IntelliJ IDEA, VS Code, Postman, Docker Desktop             |

## Projects

### TaskFlow – Modern SaaS Project Management Platform

React, TypeScript, Tailwind CSS, Spring Boot, MySQL, Git, GitHub, Postman

- Built a full-stack project management platform (Jira/Asana/Monday-like) with JWT auth, role-based access control, and multi-workspace support.
- Implemented sprint management, Kanban board, task priorities, labels, due dates, comments, file attachments, and an analytics dashboard.
- Added email invitations, notifications, dark/light themes, and REST APIs; deployed via Vercel, Render, and Railway/Aiven.

### CareerLy – Job Application Tracking Platform

React.js, Tailwind CSS, Vite, Spring Boot, MySQL, Docker, Git, GitHub, Postman

- Developed a full-stack platform to create, update, and track job applications with status tracking, search, and filtering.
- Managed interview dates/rounds, offer details, job links, and statistics/analytics with a responsive UI.
- Containerized with Docker Compose: React served via Nginx, Spring Boot backend, and MySQL database services.

### Subscription Management System

Java, Spring Boot, Spring Data JPA, Hibernate, MySQL, Maven

- Designed a layered REST API managing Users, Subscription Plans, Subscriptions, Invoices, and Payments.
- Implemented pause/resume/cancel subscription flows, simulated payments, business rules, DTOs, and global exception handling.

## Internships

### Codeway Solutions – Web Developer Intern

Feb 2024 – Mar 2024

Remote / Virtual Internship

- Worked on assigned web development tasks and gained hands-on experience in frontend development.
- Completed three assigned tasks and submitted source code and project work.

### VGM Soft Tech – Web Developer Intern

17 Jun 2025 – 16 Jul 2025

Coimbatore, Tamil Nadu

- Learned React.js and Tailwind CSS; worked on frontend development tasks for a client project as per requirements.
- Completed a personal study project; received attendance and completion certificates.

## Publications

### AI-Driven Breed Classification and Smart Trading Platform for Cattle and Buffaloes

9th IEEE International Conference on Trends in Electronics and Informatics (ICOEI-2026), SCAD College of Engineering and Technology

- Developed *LivestockIQ*, an AI-based platform integrating cattle and buffalo breed classification, disease prediction, and digital trading support.
- Built a CNN-based classification model achieving 92.4% accuracy and published the research paper in IEEE Xplore.

### Automated Recipe Generator Based on Leftovers

International Conference on Recent Trends in Green Energy (ICRTGE-2025)

- Presented *Cookify*, a web-based recipe recommendation application designed to reduce household food waste through ingredient-based suggestions.
- Developed the frontend application using React.js and Tailwind CSS with filtering and recipe visualization features.

## Education

### PSNA College of Engineering and Technology

2022 – 2026

Dindigul, Tamil Nadu, India

Bachelor of Engineering (B.E.) – Computer Science and Engineering

CGPA: 8.67 / 10

### M.K.R. Ayya Nadar Jeyalakshmi Ammal English Medium School

Madurai, Tamil Nadu, India

Class XII (HSC) Percentage: 86.6%

2021 – 2022

Class X (SSLC) Percentage: 89.0%

2019 – 2020

## Achievements

- Developed and deployed a professional portfolio website for a graphic designer as a first client-side project, managing client requirements and successful delivery.
- Published one IEEE international conference paper and one national conference paper.
- Participated in hackathons and interdepartment competitions conducted through symposiums.

## Coding Profiles

LeetCode: 230+ problems | CodeChef: 500+ problems | Skillrack: 250+ problems | GeeksforGeeks: 50+ problems

## Certifications

Java for Beginners (GUVI HCL) | Python for Data Science (IBM) | SQL (Oracle Academy) | Machine Learning (Infosys Springboard)

## Languages

English: Working Proficiency | Tamil: Native Proficiency
